Skills

Front-End		Back-End	
HTML	Scss	Node	Postres
CSS	Tailwind	Express	MongoDB
React	Typescript	GraphQL	Prisma
Redux	Material UI	REST	TypeORM

Projects

Community Fridge Finder – [Vercel](#) | [Github](#)

Tech: *Next.js, Node, Express, Mongo, GraphQL, Typescript*

Description: A web application which uses the google maps API to display data about community fridges across the US. The purpose is for users to easily find information about a community fridge near their location.

MarketPlace – [Heroku](#) | [Github](#)

Tech: *React, Redux, TypeScript, Node, Express, Postgres*

Description: Craigslist clone built during a 6-week Chingu Voyage focused on agile methodology practices. This is a web platform where users can post or view items, homes, or jobs.

Ecommerce Shop – [Heroku](#) | [Github](#)

Tech: *React, Redux, Redux Sagas, Firebase, Sass*

Description: An ecommerce site which allows for user registration and sign in, persistence through local storage, auth through Firebase and payments through stripe.

Color Collector – [GitHub Pages](#) | [Github](#)

Tech: *React, React Router, Material UI*

Description: Flat UI clone, users can create palettes and copy the hex, RGB or RGBA color values to their clipboard for use in design or front-end projects. It uses local storage to save palettes.
